«Infrastructure on a New Trajectory: Green Solutions, Resilient Cities & Sustainable Growth»

- Water: The strategic infrastructure of the future. Water resources management and water infrastructure as a survival and growth priority.
- Smart Cities, Resilient Future: Sustainable urban planning, smart technologies and climate-resilient cities.
- "Infrastructure and Logistics: The Economy's Invisible Nervous System". Modern solutions, interconnections and new investments driving growth.
- The next generation of construction: Innovation, certification, sustainability.
 Green building materials, certification standards and the added value of sustainable growth in the construction sector.
- \bullet Construction 2030: Between exponential growth and realistic expectations.
- $\boldsymbol{\cdot}$ Green infrastructure and new materials: The future of construction is viable

12:40 - 13:00 In dialogue with

13:00 - 13:20 SPOTLIGHT INTERVIEW

13:20 - 14:30 SESSION C1: ENERGY - ENERGY TRANSITION

«Strategies, challenges and prospects for Greece's energy transition»

- The Green Shift: European strategy and national commitments.
- Renewable Energy Sources: From climate obligation to competitive advantage.
- Global electricity demand and national alliances: Greece as an energy producer.
- · Efficient energy investments and the modern economy: New challenges in the energy market.
- Conventional fuels vs. Renewable Energy Sources: Balance and volatility.

14:15 - 14:30 In dialogue with

14:30 - 16:00

SESSION C2: ENERGY - ENERGY INFRASTRUCTURE & GEOPOLITICS

«Greece on the new energy map. Infrastructure, interconnections and geostrategic position»

- Geopolitics and energy: New prospects in Greece and the Mediterranean.
- · Greece as a provider of energy security: From Revithoussa and Alexandroupolis to Odessa.
- Electricity interconnections and national export capacity.
- Innovation and technological progress in green energy: A decisive challenge for Greece.
- The role of distribution networks in the energy transition: Smart grids, decentralized production and resilient infrastructure.
- · Natural gas and LNG: Regional security, infrastructure and Greece's role as an energy hub.
- Integrating renewables while ensuring electric power grid stability.

15:45 - 16:00 In dialogue with

16:00 - 17:30

SESSION D: DEFENSE & SECURITY

«European defense and the Greek reality: Electronic warfare, EU instruments and strategic autonomy»

- A new era in European defense: Challenges, opportunities and funding tools (SAFE, ReArm Europe, MFF) and Greece's adaptation to emerging EU policies and priorities.
- "Electronic warfare and cyber defense": Greece at the forefront of the new reality. European frameworks, national capabilities, challenges, opportunities and growth strategies in the critical field of cyber defence.
- EDIS / EDIP: Innovation at the heart of European defense and Greek participation, partnerships and growth prospects in cutting-edge defense technologies with a focus on digital transformation and new operational needs.
- From the MFF to a National Strategy: Financing the new defense era and leveraging EU funds to grow the Greek defense industry. Financing challenges, adjustment strategies and use of European funds by the Greek defense industry.
- Brain gain & strategic autonomy: Human capital as the cornerstone of Greek defense.
 The Greek defense doctrine, the importance of highly specialized personnel and the strategic importance of human capital for the reinforcement of defense autonomy.
- "Achilles' Shield": The next-generation air and anti-drone defense for a secure Greece in an uncertain landscape through a multi-layer air defense.

17:15 - 17:30 In dialogue with

17:30 - 18:45

SESSION E: DIGITAL TRANSFORMATION

«Digital Greece 2.0: Infrastructure, cybersecurity and the great cohesion bet»

- Competitiveness and artificial intelligence: Technology or education as the true growth lever? Digital skills and tech innovation at the service of the economy.
- Investing in the networks of tomorrow: From 5G to 6G. Connectivity infrastructure and the new challenges of the digital era.
- Edge computing, 6G and data centers: Strategic pillars of digital sovereignty.
- · Cybersecurity and critical data: The new national priority.
- Artificial intelligence and human willpower: Exploring the boundaries of dependency, control, authority and ethics.

18:30 - 18:45 In dialogue with

18:45 - 19:00 Closing Remarks / Keynote Address
